PROFILE

Full Stack Developer Pursuing B.Tech in Computer Engineering with hands-on experience in web applications and mobile applications development using React.js, Node.js, Express, and MongoDB with strong foundation in database design and scalable system architecture, with expanding expertise in developing robust , cross platform web and mobile applications. Skilled in building efficient, data-driven solutions and optimizing performance for responsive, user-centric applications.

EDUCATION

B.Tech in Computer Engineering (Pursuing) Madhuben & Bhanubhai Patel Institute of Technology , CVMU , Gujarat CGPA: 8.81 (Till 5th Semester)	2024 – 2027
Diploma in Computer Engineering Bhagwan Mahavir Polytechnic College , BMU , Gujarat CGPA: 8.67	2021 – 2024
Secondary School (10th Grade) HMB Sardar Higher Secondary School, Gujarat Board Percentage: 73.16%	2021

TECHNICAL SKILLS

- **Frontend:** HTML5,CSS3,Tailwind CSS,Bootstrap,React Native
- **Backend:** PHP,Node.js,Express.js
- **Database:** MySQL,MongoDB,Firebase
- **Programming Languages:** Javascript,Python,SQL
- **Tools:** Git, GitHub, VS Code, Expo Go
- **Concepts:** OOP,DBMS,SDLC,Authentication Systems, Basic Data Analysis
- **SoftSkills:** Team Collaboration,Adaptability,Problem Solving

PROJECTS

Campus Ride – Ride Sharing Application (React Native + Firebase)

Developed a Campus Ride Application using the React Native and Expo With Dynamic Driver/Rider Role Switching. Implemented Secure Authentication using the Firebase Authentication and Real time Data handling using the Fire Store Cloud. Increased User Engagement with Application Via Coin Based Rewards System to enable Cost Sharing without Real-Money Transactions. Improved Ride Security through OTP Based Ride Start System. Created Scalable UI Architecture with reusable Components and Smooth Navigation using Expo Router.

SmartLogix – E-Commerce Delivery Predictor (Python ML + Streamlit)

Built an ML model to predict E-commerce Product Delivery delays (On-Time vs Late). Achieved 68% accuracy and 0.74 ROC-AUC using Scikit-learn (Random Forest). Performed data Preprocessing, Feature engineering, and encoding on logistics data. Developed an interactive dashboard for EDA, predictions, and performance insights using Streamlit and Plotly. Identified key delay factors such as (discount offered and product weight) to support data-driven logistics decisions.

SecureCity – Crime Management System (PHP + MySQL)

Developed a Web-Based Crime Management System Using PHP and MySQL to manage Crime Records and Complaints. Implemented role-based access control for Admin, police, and Users with Secure login functionality. Designed and structured the database schema for efficient data storage and retrieval. Built backend logic and handled CRUD Operations for managing Crime and Complaint records. Improved Data organization, accessibility, and system security for multi-user operations.

CERTIFICATIONS

- [Designing Stories in SAP Analytics Cloud](#)

Jan 2026

ACADEMIC ACTIVITIES

- Attended the Code Unnati AI/ML training program focused on Artificial Intelligence and Machine Learning fundamentals.
- Gained exposure to core ML concepts such as supervised learning, data preprocessing, and model evaluation.
- Completed hands-on exercises and practical sessions during the program.
